DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Makuch on 13 March 2006.

The application has been amended as follows: In claim 19: add the word – metallic – between “the” and “sleeve” in “the sleeve is welded to the package”.

Allowable Subject Matter

1. **Claims 19-25** are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to claim 19: These claims are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious an optical module comprising a package mounting a laser diode in it and having a front wall, an optical component including a ceramic ferrule having a first and second portion and a tubular metallic holder securing the second portion of the ferrule, a metallic sleeve for securing a part of the holder to position it relative to the package, another sleeve for securing the first portion of the ferrule and a tubular metallic guide having three portions with the first and second covering the other sleeve and a third portion securing a portion

of the metallic holder wherein the holder is welded to the metallic sleeve, the sleeve is welded to the package and the guide is welded to the holder, in combination with the rest of the claimed limitations.

With regard to claims 20-25: These claims are allowable over the prior art of record because they depend from an allowable claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following all teach optical modules with various sleeves and holders surrounding a ferrule: Etaix (US 4,204,743), Kikuchi et al (US 5,546,490), Driessen et al (US 5,216,737), Ichino et al (US 6,071,016), Terada et al (US 2002/0114593 A1).
